

Mayo Clinic Cover Letter

April 8, 2023

Dear Amy,

I am a professional developer who is looking to hone my skills in software development and infrastructure as code. My favorite languages to write in are Python and Rust, I have lots of experience writing complex pipelines in Azure DevOps, and I am able to write, manage, and modify infrastructure as code through Terraform. I am a self-starter and quick learner with a positive attitude who would make an excellent addition to your team. I work well with others, communicate effectively, and have lots of experience with pair programming. I absolutely love solving problems and making people's lives easier through automation and am searching for a position that will allow me to do that regularly.

I believe I am the best candidate for this position because I know all of the tools used and am comfortable with them, I know the team, I have experience using GCP, and I am familiar with MCC and how it operates.

I hope you'll consider me for this position and I'd love to talk more!

Thank you,

Jake Jasmin
